

## Measurement instruction:

### Corner cabinet with slant on the right

#### Step 1:

Enter the measurements (cm) in the corresponding boxes.

#### Required tools:

tape measure or folding rule, pen, and the printed measurement guide.

#### How to measure correctly:

Measure the height and width in several places and always take the smallest measurement.

#### "Space" for easy installation:

Your cabinet must be at least 3 cm lower and 6 cm narrower than the room or installation niche.

#### More depth due to doors and front drawers:

The measurement for the depth refers to the cabinet body. If you plan to add doors or front drawers, the cabinet depth will increase by 2 cm.

#### Step 2:

After measuring, you can quickly and easily enter the data into the cabinet configurator at <https://www.Furnfab.com/en/products-corner-cabinets>.
