

Measurement guide: Panel

Step 1 – External dimensions:

Measure the width and height of your panel from edge to edge on the inside/back side of the front or panel and enter the measurements (mm) into the corresponding boxes.

Required tools:

Tape measure, pen, and the printed measurement guide.

 mm

Height of the fascia

 mm

Width of the fascia

Tip: Measure the width of the panel at both the top and bottom. If the measurements differ, take the largest one. This way, either you or one of our service partners can trim the panel to fit during installation on-site.

Step 2 – ABS edges (optional):

Do you want to protect the exposed cut edges with an ABS edge? If yes, select which edges should receive ABS edging:

complete

left

right

front

back

Step 3 – Configuration:

After measuring, you can quickly and easily enter the data into the configurator at www.Furnfab.com/en/renovating-fronts.
